

# Database

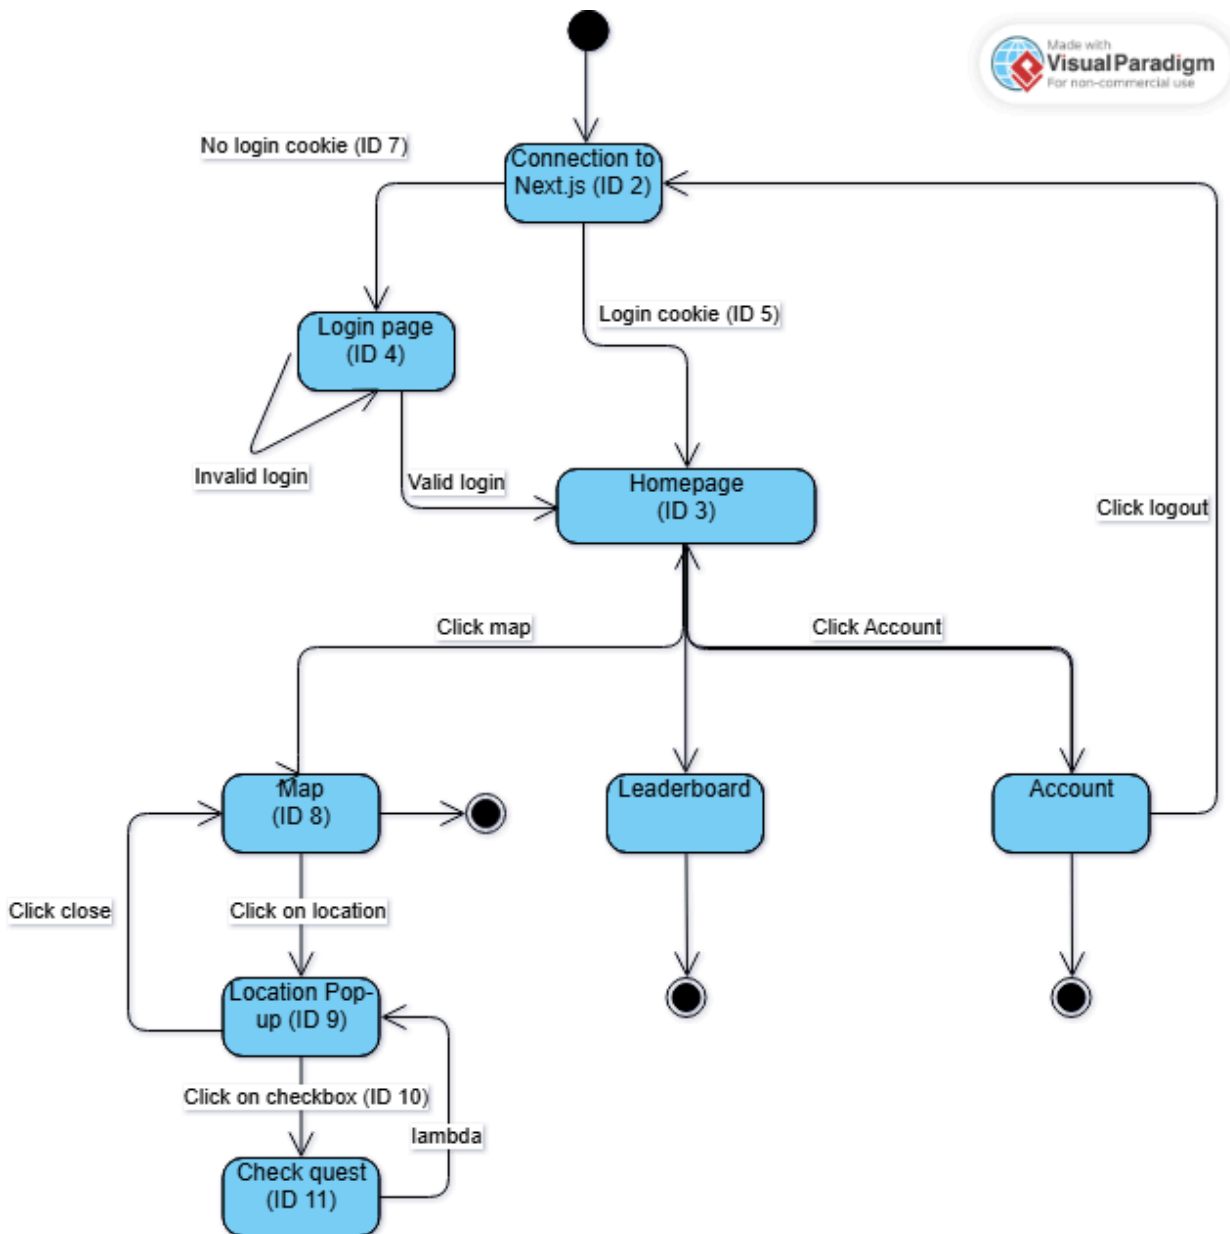

For the features in sprint one, a users table is required on the database to allow account creation and logging in.

users	
user_id	uuid
name	text
email	text
password_hash	text
created_at	timestampz

## Requirements Diagram

This is a UML diagram to demonstrate the required behavior to fulfill the requirements of Sprint 1. There must be an account system with a login flow that leads to the map, which then allows for checking off quests.

## Use Case Diagram

This is a UML diagram demonstrating the possible use cases for the features available in Sprint 1. It mainly shows how logging in affects which pages you can see, and when you can check off quests.
