

# Database Diagram

The Supabase database should be utilized to make any future quest and location additions. The schema should remain mostly the same.

The schema at this point now contains dependencies in the quest table, and a `is_admin` field in the users table to represent admin accounts.

# Requirements Diagram

For the requirements of the final sprint, all components should be polished. Focus will mainly be directed towards fixing bugs. New features may consist of new animations spread throughout the website to make it a bit more dynamic.
